

## **Remedial In-Room Decontamination System (RIDS)**

The powerful, mobile Steril-Aire RIDS brings Steril-Aire's multi-patented, scientifically proven, RIDS brings the power of highly concentrated germicidal UVC technology wherever it is needed for air and surfaces in healthcare facilities, laboratories, cleanrooms as well as food preparation and processing plants. RIDS provides infection control in hospitals/health care centers and schools; mold and bacteria control in food processing areas; and surface treatment in laboratories to prevent cross-contamination.

### **BENEFITS OF STERIL-AIRE'S REMEDIAL IN-ROOM DECONTAMINATION SYSTEM**

- **Highest performance:** Delivers the highest output germicidal UV
- **Scientifically proven results:** Uses the proven power of germicidal UV energy as an effective inactivation method for pathogens
- **Safe and ozone-free:** Uses no chemicals; produces no ozone or other toxic contaminants

- **Portable:** Flexibility to quickly bring the power of UVC where and when you need it
- **Manages risk:** Improved environmental hygiene means improved clinical outcomes, reduced cross-contamination and enhanced food safety
- **Saves time and money:** Reduces manual terminal cleaning time and costs

***Never settle for less than the power of Steril-Aire.***

The first choice in ultraviolet clean air technology is *still* the best choice. Call Steril-Aire to learn more about RIDS today.
