

## Mednest Medication Administration

The MedNest supports an efficient and safe Closed-Loop Medication Management process by integrating the physician, clinician and pharmacist workflows from the point of prescription to bedside medication administration. MedNest facilitates adherence and compliance to secure medication procedures improving both patient safety and the quality of care.

Integrate the MedNest into the full-featured CareLink Nurse Workstation, or set-up in a patient room for counter top or wall mount access. The MedNest Module provides these key features to advance facilities toward a truly closed-loop medication management system.

- Optimized clinical workflow
- Improved Patient Safety
- Enables automated tracking
- Documented open HL7 compliant platform

The MedNest is available with multiple software options to support your closed-loop medication management system and clinical workflow requirements.

## Well Suited For

- Bedside Med Administration

## Key Features
